

ASHAION

Boiler Water Treatment

ASHAION - 31 SLUDGE CONDITIONER

● APPLICATION

ASHAION - 31 boiler sludge conditioner represents a modern concept in the chemical treatment of boiler sludges. This polymer is designed to produce light, finely divided particles which are non-adherent and easily removed with blow down. ASHAION- 31 does not char or decompose under high temperature and pressure conditions and does not impart taste or odour to steam. These characteristics make ASHAION - 31 superior to many older natural organic treatments.

● ADVANTAGES

- Highly Effective.
- Non- Corrosive.
- Convenient handling
- Compatible with other treatments.
- Chemically stable
- Odourless, tasteless
- Economical
- Prevent deposits

● DOSAGES

Treatment dosages will vary depending upon feed water quality and allowable boiler water concentrations. Your ARPL Water Treatment Consultant will recommend the proper dosage based on plant operating conditions.

● FEEDING

ASHAION - 31 can be mixed with other chemicals being fed to the boiler. No restrictions are imposed by this product on the point of feed, or feeding equipment materials of construction.

● PRODUCT DATA

- | | | | |
|--------------|----------------|--------------------|----------------------------|
| ➤ Odour | : None | ➤ Specific Gravity | : 1.04 @ 25 ⁰ C |
| ➤ Appearance | : Amber Liquid | ➤ Flash-point | : None |

● HANDLING

Keep the container closed when not in use. The product should not be swallowed and prolonged contact with the skin should be avoided. If it comes in contact with the eyes, flush with clean, cold water and get medical attention.

● PACKING

ASHAION - 31 is available in 50 kg & 35 kg HDPE Carboys
