## Spray Pond Chemical

### ALGAESIDE CHEMICAL

#### APPLICATION :

It is a high potency liquid microbicide, designed to control the growth of algae and bacteria found in open recirculating cooling systems. It also provides a detergent action that cleans dead growths from cooling systems. This product is effective throughout the pH range of 6.5 to 9.5

#### ADVANTAGES :

- Read – to – use liquid
- Compatible with standard cooling water
- Easy to handle and feed
- Economical to use
- Detergent action
- Highly effective.

#### FEEDING :

It should be fed at full strength in the cooling tower basin at a point of maximum water circulation. Tower bleed off valves should be closed to permit a retention time of 4 hours.

#### PRODUCT DATA

Colour : Straw Yellow.  
Specific Gravity : 0.99 @ 25°C  
pH : 8.2

#### HANDLING :

Keep the container closed when not in use. The product should not be swallowed and prolonged contact with the skin should be avoided. Wear of goggles or face-shield and rubber gloves are recommended while handling this product. Do not discharge the treated effluent into lakes, streams or public water as the product is poisonous to fish.
