

ASHAION® OX 132 SP

High-Performance Oxygen Scavenger (Powder Form)

For Boiler Feedwater Systems & Dry Lay-up Applications

Pack Sizes: 25 Kg moisture-resistant HDPE-lined bags

Product Overview

ASHAION® OX 132 SP is a powdered oxygen scavenger based on high-purity sodium sulfite, enhanced with a catalyst system for faster oxygen removal in boiler systems. Ideal for both wet and dry lay-up, this product protects your equipment from corrosion caused by dissolved oxygen.

Key Features & Benefits

✓ Rapid Oxygen Removal: Catalyzed for high reactivity, especially in lowpressure boiler systems

 \checkmark Corrosion Protection: Prevents pitting and extends boiler life

 \checkmark Dry Lay-up Friendly: Effective in dry storage applications, preventing rust and corrosion

✓ Easy to Apply: Dissolves quickly in feedwater systems

✓ Long Shelf Life: Powder form ensures product stability during extended storage

Applications

- Industrial boiler systems
- Food, pharma, textile & sugar industries
- Standby boilers and seasonal shut-downs
- Preservation of piping, tanks, and vessels during lay-up

Typical Properties

| Property | Specification |
|------------------------|------------------------------|
| Appearance | White to off-white powder |
| pH (1% solution) | 9.0 – 10.5 |
| Solubility in Water | Completely soluble |
| Assay (Sodium Sulfite) | Min. 95.5% |
| Bulk Density | ~0.9 – 1.1 g/cm ³ |

Dosing Guidelines

- General Dose: 10–20 ppm based on dissolved oxygen levels
- · Add to deaerator feed tank or boiler feedwater line
- Contact technical support for exact dosing based on site parameters

Packaging & Storage

- 25 Kg HDPE-lined bags or drums
- · Store in a cool, dry place away from direct sunlight and moisture
- Shelf life: 24 months from MFG date

Why Choose ASHAION®?

- Trusted by over 250+ industries
- Manufactured under ISO 9001:2015 quality system
- · Backed by expert technical support and on-site consultation
